

EXTRA! EXTRA!

# EMPS IN THE NEWS

After a nuclear test over Hawaii in 1962 the U.S. was awakened to the dangers of an electromagnetic pulse (EMP). However, as technology has advanced our preparedness for such an attack has not. This leaves the U.S. ever more vulnerable to the catastrophic effects of EMPs.

Click the links below for articles on the effects and dangers of EMPs and what the U.S. can do to prepare.
